ICAO Standard ATC Courses

COURSE PROSPECTUS

AERODROME CONTROL

(ICAO 052)

Course Summary

The ICAO 052 Aerodrome Control course covers air traffic management, procedures and all aspects of aerodrome control. It provides a comprehensive grounding to Aerodrome operations in both Visual and Instrument conditions enabling entrants to operate in any aerodrome environment within or outside of controlled airspace.

The course combines theoretical and practical instruction encompassing exercises of increasing complexity designed to fully assess the written, verbal, practical and physical abilities of each entrant.

The Aerodrome Control course also includes a visit to an operational facility so a better understanding of the teaching points can be gained.

A competency certificate will be awarded on successful completion of the course to the appropriate quality standards.

Entry Criteria

- Have a minimum English language proficiency of ICAO Level 4
- Have completed the ATC Basic Training (ICAO 051) Course
