

WHO SHOULD ATTEND THIS COURSE?

The UK Approach Control Procedural course is designed as a standalone course for those who have already completed the UK Basic training course and seek to work in an Approach Procedural environment (Non-Radar), or ATCO licence holders seeking to obtain an additional rating.

A combined Tower and Approach operations module is also available following the course completion.

UK CAA Approved Courses

COURSE PROSPECTUS

APPROACH CONTROL PROCEDURAL RATING (APP)

Course Summary

This course enables on successful completion, the award of the Approach Control Procedural (APP) rating. The APP course provides comprehensive theoretical and practical training in complex approach control procedural techniques including:

- Analysis and application of separations
- Providing Flight Information Service (FIS)
- Arrival and departure planning
- Overflights
- Coordination
- Abnormal and Emergency (ABES) / Degraded Situations
- Holding and Expected Approach Times (EATs)

The practical exercises cover a wide range of traffic types through exercises of increasing complexity and density.

The course is run in two modules: controlled and uncontrolled environments.

Entry Criteria

- Successful completion of UK Basic Training Course
- A valid European Class 3 medical (recommended)
- A good command of oral and written English, assessed towards ICAO proficiency level 4 during the course

Course Duration
7 Weeks
